Initializr

Start an HTML5 project in 15 seconds!

H5BP 5.0 ***Bootstrap 3.3.1*** ***jQuery 1.11.2***

Initializr is an HTML5 templates generator to help you getting started with a new project based on HTML5 Boilerplate. It generates for you a clean customizable template with just what you need to start!

Hey everyone! Initializr is going to retire at the end of 2017. I'd recommend using H5BP or Bootstrap directly instead. It doesn't take that long to combine them together and you'll get more up-to-date versions of those. Thank you for using Initializr all these years! ❤️

Want to get better at JavaScript? I wrote a free step-by-step guide to build a modern JavaScript stack from scratch (https://github.com/verekia/js-stack-from-scratch).

1 - Pre-configuration

Classic H5BP

Docs (https://github.com/h5bp/html5-boilerplate/blob/v4.3.0/doc/TOC.md) Demo (http://demo.html5boilerplate.com/)

Responsive

Docs (http://verekia.com/initializr/responsive-template) Demo (/try)

Bootstrap

Docs (http://getbootstrap.com/getting-started/) Demo (http://getbootstrap.com/examples/jumbotron/)

2 - Fine tuning

HTML/CSS Template

- ○ No template
- ○ Mobile-first Responsive

- ○ Twitter Bootstrap

HTML5 Polyfills

- ○ Modernizr
- ○ Just HTML5shiv
- ☐ Respond - Alternatives (https://github.com/h5bp/html5-boilerplate/issues/816#issuecomment-2512805)

jQuery

- ☐ Minified
- ☐ Development

H5BP Optional

- ☐ IE Classes
- ☐ Old browser warning
- ☐ Google Analytics
- ☐ .htaccess
- ☐ Favicon
- ☐ Apple and Windows Icons
- ☐ plugins.js

- [ ] Robots.txt
- [ ] Humans.txt
- [ ] 404 Page
- [ ] Adobe Cross Domain

Download it! (builder?simplehtmltag&izr-emptyscript)

What's inside? (builder?print&simplehtmltag&izr-emptyscript)

Github Repositories

- The builder itself (https://github.com/verekia/initializr)
- The responsive template (https://github.com/verekia/initializr-template)
- This page (https://github.com/verekia/initializr-website)

About Initializr

Initializr is here to kick-start the development of your new projects. It generates templates based on HTML5 Boilerplate by allowing you to choose which parts you want or don't want from it. A responsive template (http://verekia.com/initializr/responsive-template) has also been added to start from a basic design instead of a blank page.

International guides

Initializr functioning is pretty intuitive but it can help to read guides about it in your own language. Here are some which will help you using Initializr and understanding HTML5 Boilerplate, HTML5shiv or Modernizr, in French (http://verekia.com/initializr/initializr-generateur-template-html5-boilerplate/), Italian (http://simonebertuccioli.it/archives/initializr/), Russian (http://starwebdesign.com.ua/blog/2011/02/16/initializr-generator-chistogo-i-nastraivaemogo-html5-shablona-osnovannogo-na-boilerplate/), Dutch (http://www.jaapvdveen.nl/2011/02/17/initializr-een-template-generator-op-basis-van-html5-boilerplate/), Portuguese (http://flaviosilveira.com/2011/initializr-comece-seu-projeto-html5-em-15-segundos/), Polish (http://blog.plainly.co/initializr-polish-guide/), and Japanese (http://blog.imho.jp/p/blog-page.html).
